Manufacturing

Products are manufactured at our In-House manufacturing set up. We ensure optimum quality check at each stage of production process.

We have a good strength to manufacture and supply you with any size of requirement; in a reasonable lead time.

We offer to manufacture customized components; as per your technical specifications.

Our Cycle explained

Receipt of Order till Dispatch

	Planning Stage	<i>On receipt of an Order, we check our stocks for availability, and we develop our action-plan to manufacture your requirement, bill of material is prepared accordingly. Where an item is an odd size, we develop the die for the same.</i>
	Raw Material	<i>As per Bill of Material; all materials are sourced with appropriate test certifications.</i>
	Cutting/Phasing	<i>Materials are cut, to an appropriate sizes, as per the ordered items.</i>
	Quality Check	<i>Cutting follows checking for any material defects</i>
	Machining	<i>Materials are lined up for its machine process, for drilling, finishing, etc; as per the product.</i>
	Quality Check	<i>Materials are checked for quality, after it's out from machining.</i>
	Plating/Surface	<i>Machined items, once approved, are preceded towards Plating and Surface Treatment, as per requirement.</i>
	Quality Check	<i>Materials are again tested and checked for assuring proper quality.</i>
	Dispatch	<i>Once all set fine, products are packed, and are ready for dispatch.</i>
